Sketches of Urban Villages @ Southeast Asia.

Plans / Urban Villages.

- ~~1. Southeast Asia's architecture was mainly unknown and can only be identified identified~~ based on its subgroup of customs & locals. At the crossroad between the past conflicts and modernity this book would like to capture the real life living condition of people @ SEA. From here we would like to analyse how the people, culture and weather influence the architecture in transition in SEA. The selection of villages are based on it's uniqueness in adaptation to the extremes, unseen anywhere else. but in SEA. mid span.
1. Jakarta Urban Villages. indigenous
2. Cambodia. Re-organised slum into existing structure.
