Glossary

Term	Acronym	Definition
Application Programming Interface	API	A term given to the way that data and information on websites is stored so that it can be easily shared between computers. Data can also be extracted from websites by using the API. See more here https://en.wikipedia.org/wiki/API
Ecology of Resources		A set of resources (e.g. tools such as Zoom) that you use to interact and communicate with others, including students and colleagues. For more information see: https://doi.org/10.4324/9780203075227.ch3
Figshare		A repository that can be used for publishing and sharing creative and research outputs (except for journal articles/theses). The University has an institutional figshare that all staff can use: https://melbourne.figshare.com/
Galleries, libraries, archives, and museums	GLAM	refers to cultural institutions with a mission to provide access to knowledge (https://en.wikipedia.org/wiki/GLAM_(industry_sector))
Melbourne Data Analytics Platform	MDAP	A team of Research Data Specialists working to enable data-intensive research across the disciplines, as part of the University of Melbourne's Petascale Campus Initiative
Omeka		An online gallery platform for showcasing and displaying research outputs. https://gateway.research.unimelb.edu.au/resources/platforms-infrastructure-and-equipment/research-computing-services/services/data-storage-management/omeka
Post-digital		Post-digital theory examines how our relationship with digital technologies has changes, and is changing. It emphasised human experience over digital design. Read more here: https://en.wikipedia.org/wiki/Postdigital
Scholarship of teaching and learning	SOTL	A systematic approach that uses investigations into student learning to inform educational practice.
Scholarship of technology enhanced learning	SoTEL	SOTL that is specifically applied to TEL practices
Social and Cultural Informatics Platform (is that right?)	SCIP	Embedded within the Humanities, Arts and Social Science faculties; provides specialist support with digital research methods and project delivery.
Technology enhanced learning	TEL	When technologies of any kind are used to enhance the learning experience in any way
Web scraping		The term used for describing when data is systematically extracted from websites using programs and code. See more here: https://en.wikipedia.org/wiki/Web_scraping
